

# FREE STENCIL PACK

## *Under the Sea*

Thank you for downloading a free stencil pack. I hope that you enjoy all of the underwater goodness of the shapes in this pack.

For best results, print your stencil(s) on heavy cardstock (it's easier to use as a stencil than, say, copy paper) and cut out the designs with an Xacto or craft knife. Some people have good luck (and good skills) with scissors, but I am not one of those people. Your mileage may vary.

Stencils can be used in all kinds of projects, but you don't *have* to use these shapes as stencils. You can use them as a template to doodle or draw in, if you like. However you use your designs, whatever you create, I would love to see it! Be sure to share it with me at <http://KatStudio.StayInspiredLLC.com/FinishedPages>

These shapes are available for personal use. Commercial use of derivative art is allowed. That means that you can sell whatever you make from these shapes, as long as you're not just reselling the shapes.

Have fun and, as always, Stay Inspired!

Be sure to visit our website and join our newsletter to receive free goodies like additional coloring pages, online drawing courses, free video tutorials, ideas, and more inspiration than you can shake a fist at!
